23 January 1959

MEMORANDUM FOR: Deputy Director (Intelligence)

SUBJECT: Organization of Army Special Activities
Division Located at PIC

1. As mentioned during your visit here on 21 January, the Army T/O now includes [redacted] here at PIC. A copy of the organization chart is forwarded herewith for your information and disposal.

25X1

2. A very close parallel of organizational lines exists between PIC's Military-Scientific Division and the Army's Scientific and Technical Branch as presently delineated. We continue to have the most excellent working relations with the Army Division which is very effectively lead by Lt. Col. Charles Allen USA. In fact, as the Army T/O has expanded, some of its personnel are actually located in our Military-Scientific Division spaces.

3. None of the on board Army personnel are cleared for the "C" project, but I would expect that some of the leaders will be coming in soon. Col. Herbert Jordan USA has indicated that the Army will probably be transferring funds in excess of \$200,000 to this project for equipment and computer program cost sharing. I think that this is just another indication of Lt. Gen. Willem's belief in our joint mission and Army willingness to shoulder a share of the expenses. This should make Mr. Bissell very happy.

ARTHUR C. LUNDAL
Director,
Photographic Intelligence Center
